In the Box

Guide Section

Setup Instructions

Unboxing

- Carefully remove the keyboard and accessories from the box.

Software Installation (Optional)

- Download the configuration software from the manufacturer's website if you wish to customize key functions or lighting.
- Follow the on-screen instructions to install the software.

Connecting the Keyboard

- Plug the USB cable into an available USB port on your computer.
- The keyboard should be automatically recognized and ready for use. No additional drivers are required.

Keycap Removal and Replacement

- Use the included keycap removal tool to gently pry off keycaps for cleaning or replacement.
- Replace keycaps by aligning them over the switch and pressing down until they click into place.

Using the Keyboard

Support Section

Troubleshooting

Keyboard Not Responding

- Ensure the USB connection is secure.
- Try connecting the keyboard to a different USB port.
- Restart your computer if necessary.

Key Not Registering

- Confirm that no physical obstructions are affecting the key.
- Test the key in different applications to determine if the issue is software-related.

Maintenance and Care

Cleaning

Storage

Backlighting Not Working

- Check if the backlight is disabled or set to a minimal brightness level.
- Verify that the configuration software is properly installed.
